## Original vocabulary for Hospital Item Dominoes #2

1. *This activity is best done in a group with one set of cards between 3 to 5 students.*
2. *Create a set of 40 cardboard-backed cards for classroom use. Alternatively print copies for students to take home and practise.*
3. *Prepare for the activity by familiarizing students with the vocabulary (below).*
4. *When you're ready to play, lay all the cards face up on a large table or desk.*
5. *Choose a card at random. Try to match another card to the part of the word on the first card (for example, match 'safety' to 'pin').*
6. *Try to avoid making combinations such as medical cream, rubber mask, and children's medicine.*
7. *Remember that it may not be possible to create a perfect, complete chain each time. Sometimes the chain may need to be broken up and reconnected. The activity will work best if the combinations are compounds derived from the list below:*

anti-infection mask

antiseptic cream

bedside table

children's ward

first aid kit

gauze dressing

gauze bandage

hearing aid

hypodermic needle

medical instruments

oxygen mask

oxygen outlet

oxygen tube

powdered medicine

pulse oximeter

rectal thermometer

reflex hammer

room thermometer

rubber sheet

rubber tube

safety pin

spouted water cup

sterile dressing

surgical gown

surgical mask

thermal blanket

throat lozenges

tongue depressor

tuning fork

vital signs monitor

walking frame

walking stick

wash basin

wash cloth

waste basket

waste bin
