## Advice for playing Medical Dominoes

- This activity is best done with one set of cards between 3 to 5 students.
- Prepare for the activity by familiarizing students with the vocabulary (below).
- When you're ready to play, lay all the cards face up on a large table or desk.
- Choose a card at random, then try to match another card to the part of the word on the first card (for example, match 'hypo-' to '-tension').
- Keep building a chain of cards, working from both ends of the chain.
- Be careful! Some endings on the cards are very similar (-ology / -logy)
- Encourage students to make one long chain, not several small chains.

## Medical Dominoes Vocabulary Sheet

**antibiotics** / **anti**-histamine

**biological** / **biologist** / **biology**

**cardiologist** / **cardiology**

**hydrogen** / **dehydration**

**dermatitis** / **dermatological**

**dialysis** / **diarrhea**

**exhale** / **external**

**gastroenteritis** / **gastrology** / **gastrological**\*

**hemoglobin** / **hemorrhage**

**hypertension** / **hyperventilate**

**hypodermic** / **hypotension**

**malaria** / **malnutrition**

**microscope** / **microscopic**

**neurologist** / **neurology**

**paralysis** / **paranoid**

**post-natal** / **post-operative**

**pre-natal** / **pre-operative**

**psychologist** / **psychology**

**re-attach** / **re-insert**

**urology** / **urologist** / **urological**

\*(avoid **gastroscope**, hydrology, hydrologist, extension.)
